

PASS Program Overview

EL Series – Electrode Steam Humidifier

TRAINING PREREQUISITE

Technicians must complete and pass the PASS online training provided by Nortec as a prerequisite before attending the hands on training at the factory or with the training trailer.

TRAINING OVERVIEW

Technicians will be able to prove competency in the following areas;

- Understanding why humidity benefits industry.
- Understand why Nortec’s electrode technology is the leader using the Auto Adaptive current monitoring system.
- Demonstrate and show competency in performing safe work practices on the EL unit. For example lock out tag out, water shut offs, prevent flood issues.
- Provide customer with value through competent knowledgeable service.

TRAINING OBJECTIVES

- Why use electrode technology for industry.
- Identify technologies components.
- Understand the principles of operation.
- Installation requirements including electrical, supply water, drain water, condensate, steam lines and distributors, controls and safeties.
- How to complete a safe and complete start-up of the unit.
- Understanding how to trouble shoot the technology.
- How to complete maintenance to the unit.
- How to request warranty and parts.

CERTIFICATION

Upon completion and receiving a passing grade, technicians will be Nortec registered as a “Nortec Accredited Technician” for the EL Technology for 3 years, and service vehicle branding will be available upon request.
